## Section 2-Hazards Identification

**Emergency overview:** N/A

**Classification according to GHS**

Not a dangerous substance according to GHS

### Label elements

<b>Hazard pictogram(s):</b>	No available
<b>Signal word:</b>	No available
<b>Hazard statement(s):</b>	No available
<b>Precautionary statement(s):</b>	
<b>Prevention:</b>	No available
<b>Response:</b>	No available
<b>Disposal:</b>	No available

**Environmental Hazards :** no relevant information.

**Important symptoms:** See Section 11 for more information.

**Emergency overview:** In case of accident or if you feel unwell, seek medical advice immediately. See Section 4 for more information.

## Section 4- First Aid Measures

### Description of first aid measures.

**General information** No special measures required.

#### After eyes contact

Flush eyes with plenty of water for several minimums while holding eyelids open. Get medical attention if irritation persists.

#### After skin contact

Remove contaminated clothing and shoes. Immediately wash water and soap and rinse thoroughly. Wash clothing and shoes before reuse. If irritation occurs, get medical attention.

#### After inhalation

Remove victim to fresh area. Administer artificial respiration if breathing is difficult. Seek medical attention.

#### After swallowing

Do not induce vomiting. Get medical attention.

# MSDS Report

**Personal protective equipment for first-aid responders:** No available

**Most important symptoms/effects, acute and delayed:** No available

**Indication of immediate medical attention and special treatment needed:** No available

## Section 5- Fire Fighting Measures

**Suitable extinguishing media:**

Use extinguishing agent suitable for local conditions and the surrounding environment

Such as dry powder, CO<sub>2</sub>.

**Unsuitable extinguishing media:**

No further relevant information available.

**Specific Hazards arising from the chemical:**

Special hazards arising from the substance or mixture

Battery may burst and release hazardous decomposition products when exposed to a fire situation. Lithium ion batteries contain flammable electrolyte that may vent, ignite and produce sparks when subjected to high temperature (> 150°C(302°F)), when damaged or abused (e.g. mechanical damage or electrical overcharging); may burn rapidly with flare-burning effect; may ignite other batteries in clothes proximity.

**Specific protective actions for fire-fighters:**

Protective equipment: Wear self-contained respirator. Wear fully protective impervious suit.

## Section 6- Accidental Release Measures

**Personal Precautions:**

Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation

**Protective equipment:**

No further relevant information available.

**Emergency procedures:**

Remove ignition sources, evacuate area. Sweep up using a method that does not generate dust. Collect as much of the spilled material as possible, placed the spilled material into a suitable disposal container. Keep spilled material out of sewers, ditches and bodies of water.

**Environmental precautions:**

Do not allow material to be released to the environment without proper governmental permits.

**Methods and materials for containment and cleaning up:**

All waste must refer to the United Nations, the national and local regulations for disposal.

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

## Section 7- Handling and Storage

### Precautions for safe handling:

Consumption of food and beverage should be avoided in work areas.

Wash hands with soap and water before eating. Drinking.

Ground containers when transferring liquid to prevent static accumulation and discharge.

### Information about fire and explosion protection

Batteries may explode or cause burns, if disassembled, crushed or exposed to fire or high temperatures. Do not short or install with incorrect polarity.

### Conditions for safe storage, including any incompatibilities:

#### Requirements to be met by storerooms and receptacles

Store in a cool, dry, well-ventilated place.

#### Information about storage in one common storage facility

Keep away from heat, avoiding the long time of sunlight.

#### Further information about storage conditions

Keep container tightly sealed.

#### Specific and use

No further relevant information available.

## Engineering control:

The usual precautionary measures for handling chemicals should be followed.

Keep away from foodstuffs, beverages and feed.

Remove all soiled and contaminated clothing immediately.

Wash hands before breaks and at end of work.

## Personal Protective Equipment

**Respiratory protection:** Wear a suitable protective mask in order to reduce the respiratory system. A large number of leakage, wear chemical protective clothing, including self-contained breathing apparatus.

**Hand protection:** Wear appropriate protective gloves to reduce skin contact.

**Eyes protection:** Wear safety goggles or eye protection combined with respiratory protection.

**Skin and Body Protection:** Working environment required, wear suitable protective clothing to minimize contact with skin. The type of protective equipment must be according to the concentration and the content of certain hazardous substances in the workplace.

## Section 9- Physical and Chemical Properties

**Carcinogenicity:** Not available

**Reproductive toxicity:** Not available

**Specific target organ toxicity-Single exposure:** Not available

**Specific target organ toxicity-Repeated exposure:** Not available

**Aspiration hazard:** Not available

**Information on the likely routes of exposure:** Not available

**Eye:** Not available

**Skin:** Not available

**Ingestion:** Not available

**Inhalation:** Not available

## Section 12- Ecological Information

**Ecological Toxicity:** No further relevant information available.

**Persistence and degradability:** No further relevant information available.

**Bioaccumulative Potential:** No further relevant information available.

**Mobility in soil:** No further relevant information available.

**Other adverse effects:** No further relevant information available.

## Section 13- Disposal Considerations

**Disposal methods:**

**Recommendation:**

Consult state, local or national regulations to ensure proper disposal.

**Uncleaned packaging**

**Recommendation:** Disposal must be made according to official regulations

**Transport information:**

The Lithium ion battery (18650) has passed the test UN38.3, according to the report ID: 1114030079.

According to the Packing Instruction 965 section II of IATA DGR 56<sup>th</sup> Edition for transportation.

According to the special provision 188 of IMDG (36-12). The products are not subject to dangerous goods.

Separate batteries when shipping to prevent short-circuiting. They should be packed in strong packaging for support during transport. Take in a cargo of them without falling, dropping, and breakage. Prevent collapse of cargo piles and wet by rain.

**Note: Batteries weight in the package<5kg(By air, Batteries installed in equipment).**

**Transport Fashion: By air, by sea.**
